

Malaysian Exhibitors @ Hannover Messe 2018

**HANNOVER
MESSE**

Acknowledging the importance of interfacing with the latest innovations and technologies, with Germany as one of Malaysia's major export destination of machinery, equipment & parts, the Malaysia External Trade Development Corporation (MATRADE) is organising an Export Acceleration Mission to Hannover Messe 2018, led by its CEO, Ir. Dr. Mohd Shahreen Zainooreen Madros. The mission comprises of sixteen Malaysian companies.

The exhibiting companies are showcasing Malaysia's capability in the areas of engineering solutions, precision engineering and machining for semiconductor automation, rubber gloves, textile, heavy plant such as steel making plant, customised designed transformers, busduct system, manufacturing of back-end test equipment for semiconductor industry, web technologies for industrial automation, factory automation and back-end semiconductor test equipment, electronic products, process system control engineering, bulk material handling equipment plant automation and integration system, total industrial solution in design, manufacturing and fabrication for automation system and robotic towards eco innovation adoption and data warehousing and business intelligence management.

About MATRADE:

Malaysia External Trade Development Corporation (MATRADE) is Malaysia's national trade promotion agency and is a non-profit organisation.

Our services include:

- Providing information on Malaysian products/services, trade fairs and conferences and other events;
- Servicing trade and business enquiries on Malaysian exports;
- Organisation of business matching between foreign importers and Malaysian exporters;
- Providing trade advisory services on doing business with Malaysia;
- Assistance for individual companies visiting Malaysia looking for suppliers or business partners;
- Delegation and mission organisation and coordination to Europe and Malaysia;
- Organisation and coordination of international trade fair participation (Malaysia Pavilion).

MATRADE is represented worldwide at 40 locations in major commercial cities.

Daepac Industries Sdn Bhd

DAEPAC Industries Sdn. Bhd. was incorporated in 1996. The principal activities of DAEPAC are custom metal stamping, multi-slide parts and mechanical assemblies to serve the needs of global markets.

DAEPAC produces high quality precision at competitive prices. We provide complete designs and services from conceptualisation through production and delivery.

With our customers, we work hand in hand to create tool designs to help reducing manufacturing costs and to assure efficiency in die maintenance to lower our overall production expenses.

BUSINESS ACTIVITIES

CUSTOM METAL STAMPING, MULTI-SLIDE PARTS AND MECHANICAL ASSEMBLIES

BUSINESS INTEREST

ELECTRICAL AND AUTOMOTIVE INDUSTRY OR INDUSTRY THAT REQUIRES METAL PARTS

Linkk Busway Systems Sdn Bhd

Linkk Busway Systems (M) Sdn Bhd was incorporated in 2010 and took over Megaduct Technology Sdn Bhd. Megaduct busduct have successfully supplied more than 1000 projects in Malaysia as well as in more than 25 cities worldwide.

We are certified ISO 9001:2015 and our products are tested with IEC 61439-6, certified by UL, KEMA DEKRA, KEMA KUER and ASTA. With our 15 years of experience on processing epoxy insulation, we can guarantee that the optimal quality is given to our customers. Linkk is committed to continuously improve: we invest in R&D, developing and enhancing resources. We value our customers' comments for improvement on products and services in order to regularly achieve new milestones.

BUSINESS ACTIVITIES

MANUFACTURING BUS DUCT

BUSINESS INTEREST

LOOKING FOR AGENT

Malledge (M) Sdn Bhd

In 2002, the Company has changed its legal entity to 'Private Limited Company', known as Malledge Engineering Trading Sdn. Bhd. (METS B). METS B purchased a commercial building at Taman Industrial Ringan Chain Ferry where a customer satisfaction tool room could be established for engineering support.

With the company's professional expertise and reputation for delivering uncompromising quality and outstanding customer service, METS B is well on track to meet new challenges ahead in the engineering industry, both nationally and globally.

Adapting to the recent restructuring of organisation and market's needs, Malledge Engineering Trading Sdn Bhd has turned to Malledge (M) Sdn Bhd for the preparation to enter the global market. Today, Malledge (M) Sdn Bhd is the name servicing the industry with high-quality service and extreme customer satisfaction.

(Malledge continued)

For more than a decade, Malledge (M) Sdn Bhd has been a supportive partner for precision engineering & machining partner for various industries such as semiconductor, automation, rubber glove, textile, and heavy plant industries.

With the recent investment of precise CNC Turn & Mill Centre, we have expanded our business to various ASEAN countries and our business is now expanding and growing worldwide.

BUSINESS ACTIVITIES

PRECISION CNC MACHINING SERVICES

BUSINESS INTEREST

WE TARGET MACHINE MAKER OR INDUSTRIAL DESIGNER

Setsu Precision Technology (M) Sdn Bhd

Setsu Precision Technology Sdn Bhd is a leading Precision Machine Shop in Malaysia with significant global presence since 1997. Setsu specialises in high speed Computer Numerical Control (CNC) Milling and Turning on a wide array of material, ranging from metal to engineering plastics. We manufacture precision mechanical parts for various industries from low to high manufacturing volumes.

Setsu has a sizable team of competent professionals to cope with its vast production. Armed with adequate industry knowledge, the leading industry insiders in Setsu work hand-in-hand to transform machining parts into their planned sizes and shapes. Setsu embraces technology and never cease to incorporate cutting edge technology into its production.

The advanced production methods in Setsu have along the years of its operation satisfied countless clients, allowing it to earn brilliant reputation. Setsu's distinctive philosophy is to offer top-tier products at competitive prices with on-time delivery, at all times. It is also with this philosophy that Setsu has achieved some of the highest appraisals and prestigious awards in the industry.

BUSINESS ACTIVITIES

MANUFACTURER OF PRECISION COMPONENTS FOR VARIOUS INDUSTRIES

BUSINESS INTEREST

Galactic Advance Engineering (M) Sdn Bhd

Incorporated in Malaysia, Galactic Advance Engineering (M) Sdn. Bhd. over the past decade has supported the automation industries especially with reference to Siemens Simatic PLC S5, PLC S7, Siemens Drives, Simatic WinCC HMI. Speed and efficiency is the primary driving force of our service and support team for all the above mention range of products. Through many of our encounters for emergency supports and solutions, Galactic has earned its reputation for quick and excellent support as well as for its extensive experience in the field of industrial automation. To achieve this level of excellence the company rigorously pursues quality and reliability at every stage of its way.

Our current venture into energy saving and our renewable energy initiatives are aimed at maximizing clients resources by helping them to gain optimum output for minimum input. Our installed base solar energy systems, hydraulic press management control system and cold room energy saving effort have yielded a positive outcome and given us confidence that the direction taken by Galactic – to use automation based solutions to fuel energy saving combined with the injection of renewable energy – paves the way to a sustainable future.

With our team of engineers, we build, commission, service, and maintain these automated systems. To our credit, Galactic Advance Engineering (M) Sdn Bhd is the system engineering arm to several multi-national companies in this region.

BUSINESS ACTIVITIES

INDUSTRIAL AUTOMATION SOLUTION PROVIDER - SYSTEM INTERGRATION - AUTOMATION CONSULTANCY - CUSTOM MADE MACHINERIES

BUSINESS INTEREST

PROVIDE TOTAL AUTOMATION SOLUTION FOR CUSTOMER - TO INNOVATE AND INVENT MACHINERY IMPROVEMENT - PROVIDE WORLD CLASS ENGINEERING SERVICES

Bulk & Fluids Engineering Sdn Bhd

Bulk And Fluids Engineering Sdn. Bhd. (BAFE) is a fast growing Malaysia based company providing integrated process system & equipment, fabrication work for various industries and support to plant automation and IoT related system & equipment.

BAFE has progressed and is dedicated to serve the client with tailor-made equipment & systems to suit the manufacturing process & design requirements. In unison with the industrial revolution 4.0, BAFE has developed unique engineering solutions and provides a one-stop solution of smart manufacturing technology to the client.

We are able to provide the right solution for various integration systems and plant process engineering needs.

Service4u Sdn Bhd

Outsourcing is not just a strategy for cost reduction. It is an essential element of growth.

Service4U was founded by in 2008 by a group of technology enthusiasts offering their services in the fields of semiconductors, enterprise IT & telco outsource, such as:

1. CloudPBX (Voice over Cloud Technology) premise for long-term or short-term
2. Voice communication for commercial, manufacturing, semiconductor, real-estate developers
3. Customised and re-branded major telco solution (Smart Outsourcing Solution)
4. CRM and data mining solution for contact centers
5. Community application solution

As a regional outsource service partner, we help our partners and customers in other countries to extend their service offerings as a One Stop Center for their global clients. We are also partnering and working with regional companies in providing solutions for any requirements beyond their domain expertise, enabling them to serve their customers with a more comprehensive service portfolio. Our specialisations include, but not limited to:

- Network Outsourcing (Cloud, Bigdata)
- Telco Outsourcing (CloudVoice, Metro-E, P2P, Fibre)
- Test & Deployment
- Provision of Managed Services (IOT, Cloud, Data Mining) Our Mission
- Professional Service: To be the leading edge of technology development and service offering in Services and Solutions industry.
- Proactive Solution: Provide shifted-ready integrated solution that is flexible to meet the changing needs.
- Productive Delivery: To serve both local and regional market with diversity of productive driven costing model.

BUSINESS ACTIVITIES

TECHNOLOGY SOLUTION CLOUD BASE SOLUTION

BUSINESS INTEREST

EXPORT MALAYSIA MADE TECHNOLOGY SOLUTION TO OTHER COUNTRIES

Ecava Sdn Bhd

Ecava was formed by three engineers in 2005 who produced the niche Industrial Automation software IntegraXor SCADA, which is the only off-the-shelf SCADA software in the Malaysian market. Moreover, Ecava IntegraXor is leading in world-wide markets in Web SCADA space featuring the leanest and fastest system in transmitting heavy industrial control data through a latency network. As the pioneer in pure Web SCADA, Ecava has presented a white paper regarding the usage of web technologies for SCADA in Paris, granted with 2 patents in U.S.

Ecava also actively collaborates with US Cyber Emergency Response Team in mitigating vulnerabilities in critical systems, which can be a mining machinery in South Africa or a nuclear plant in Poland. Being a very versatile engineering tool for rapid development application, engineers worldwide have successfully downloaded and use Ecava IntegraXor to build sophisticated and modern process control automation systems in their plants/factories. Ecava IntegraXor has set its footprint in various industries like utility plants, oil & gas, mining applications and building automation. Similar to many successful companies, Ecava has sold more SCADA systems overseas with now more than 1000 installed sites worldwide since it was launched in 2010. The majority of the users are from USA and Europe.

TXMR Sdn Bhd

TXMR is a company based in Selangor. Established in 2010, we provide total industrial solutions in design, manufacturing and fabrication of automation system and robotic towards eco innovation adoption.

BUSINESS ACTIVITIES

INDUSTRIAL SOLUTIONS FOR AUTOMATION SYSTEM AND ROBOTIC

BUSINESS INTEREST

FOCUS ON MANUFACTURING AND AUTOMATION IN AUTOMOTIVE, AEROSPACE AND GENERAL INDUSTRIES

Robolab Technology Sdn Bhd

Robolab Technology Sdn Bhd is among the first and leading technological consultancy companies in the area of digital transformation. Our group was established in 2010 in Malaysia and is a subsidiary of Intellogic Technology Sdn. Bhd.

Robolab Technology stands for top quality services and a high technology strategy. We are specialised in digitalisation and industry 4.0 strategisation and consultation services, in robotics systems design and development as well as training.

BUSINESS ACTIVITIES

SMART SYSTEMS INTEGRATION, DIGITAL PROJECT MANAGEMENT, DIGITAL STRATEGIES AND BUSINESS MODEL, DIGITAL PROCESS IMPROVEMENT, DIGITAL COMPETENT DEVELOPMENT

BUSINESS INTEREST

DIGITAL SYSTEM CONSULTATION AND SOLUTION, DIGITAL PRODUCT SOLUTION

Datmel Technology (M) Sdn Bhd

Datmel Technology Sdn Bhd (DTSB) is a SME Malaysian company that has been involved in the Research and Development (R&D) field since 2009. Our in-house local engineers have vast experience in developing products conforming to international standards for global needs. We specialise in developing and manufacturing products for the electrical, electronics, and power engineering fields. We mainly concentrate on products that can be used as an import substitute in Malaysia.

DTSB is also actively involved in the development, maintenance and marketing of ICT solutions and products for the public sector. DTSB has a technology acquisition program with few of its counterparts from India, France and Taiwan in this field. DTSB has embarked on the challenges in providing infrastructure for an information superhighway connecting government, citizens and the private sector. In our drive to become a leading ICT company in Malaysia, we have forged partnerships and collaboration with leading IT industry vendors, government-linked companies and private universities.
